

PROFILE

Junior Web Developer focused on JavaScript, passionate about building web applications. I work mainly with React on the frontend, and with Node.js and Express on the backend, but I'm ready to learn new tools and stacks based on the team's needs. I have a competitive mindset and a strong drive to learn and improve every day. Team-oriented and motivated by feedback and knowledge sharing, I'm seeking an internship to contribute to real-world projects and grow as a developer.

TECHNICAL SKILLS

Languages

- HTML, CSS, JavaScript, TypeScript.

Databases

- PostgreSQL, MySQL.

Frameworks & Libraries

- React, Node.js, Express.

Tools

- Git, GitHub, Postman, Prisma (ORM).

SOFT SKILLS

Perseverance

- Perseverant and consistent under challenge.

Team spirit

- Team-oriented, enjoys feedback and collaboration.

Fast Learner

- Learns fast, adapts quickly.

Ambitious

- Competitive mindset, motivated to improve.

LANGUAGES

English

- Advanced (C1).

French

- Bilingual (C2).

German

- Native.

PROJECTS & EXPERIENCE

2025 – PRESENT FULL-STACK WEB DEVELOPER | ACADEMIC & PERSONAL PROJECTS

Backend and frontend web applications built as part of personal and training projects, documented and versioned on GitHub.

Repo: <https://github.com/Mhd-bnt/node-supabase-auth-api>

- Built REST APIs using Node.js, Express, and TypeScript.
- Designed and managed relational databases using PostgreSQL and Prisma ORM.
- Implemented secure authentication (JWT, bcrypt) and protected routes with auth middleware.
- Built a JWT auth middleware: parses Bearer tokens, verifies signatures, and handles expired and invalid tokens.
- Building a React and TypeScript frontend project.
- Added API security features such as rate limiting.
- Implemented a custom logger for structured request and error logs.

2024 – 2025 WEB DEVELOPER | ACADEMIC PROJECTS & HACKATHON (EFP)

Training projects focused on web fundamentals, backend development, and team collaboration; source code available on GitHub.

Repo: <https://github.com/Mhd-bnt/bagapar>

- Developed a full e-commerce web application in PHP (MVC architecture).
- Built an admin CRUD (Create, Read, Update, Delete) for product management.
- Developed core features including a shopping cart and wishlist (add, remove, update).
- Participated in the EFP Hackathon 2025, working in a team under time constraints.
- Built responsive showcase websites using HTML, CSS, and JavaScript.
- Worked with MySQL databases using PDO.

EDUCATION

2024 - Present

EFP Uccle

- Web Development

2022 - Present

Royal Belgian Football Association

- UEFA C & Brevet B Coaching Certifications

2011 - 2014

EPHEC Ottignies-Louvain-la-Neuve

- Bachelor's Degree in Marketing

2011

Institut d'enseignement secondaire des Sacrés-Cœurs

- Certificat d'enseignement secondaire supérieur
